

**Additional file 6. Venn-diagram of the putative  $\sigma^{32}$  regulons in *Buchnera*.** Sets of genes with a predicted  $\sigma^{32}$  promoter in the 500 bp located upstream of the start codon in the four *Buchnera* strains *BAp*, *BSg*, *BBp* and *BCc*. The total number of predictions for each strain is given next to the strain names.
