IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP's aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of information technology for the benefit of all people.

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP's events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- Open conferences;
- Working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is about information processing may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly, National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.

Preface

It has been 58 years since the term artificial intelligence (AI) was coined in 1956 by John McCarthy at the Massachusetts Institute of Technology USA. Since then, after huge efforts of the international scientific community, sophisticated and advanced approaches— e.g., games playing, (computers capable of playing games against human opponents) natural languages, computers able to see, hear, and react to sensory stimuli— that would appear only as science fiction in the past are gradually becoming a reality. Multi-agent systems and autonomous agents, image processing, and biologically inspired neural networks (Spiking ANN) are already a reality. Moreover, AI has offered the international scientific community many mature tools that are easily used, well documented, and applied. These efforts have been continuously technically supported by various scientific organizations like the IFIP.

The International Federation for Information Processing (IFIP) was founded in 1960 under the auspices of UNESCO, following the first historical World Computer Congress held in Paris in 1959. The first AIAI conference (Artificial Intelligence Applications and Innovations) was organized in Toulouse, France, in 2004 by the IFIP. Since then, it has always been technically supported by the Working Group 12.5 “Artificial Intelligence Applications.” After 10 years of continuous presence, it has become a well-known and recognized mature event, offering AI scientists from all over the globe the chance to present their research achievements. The 10th AIAI was held in Rhodes, Greece, during September 19–21, 2014.

Following a long-standing tradition, this Springer volume belongs to the IFIP AICT series and it contains the accepted papers that were presented orally at the AIAI 2014 main conference. An additional volume comprises the papers that were accepted and presented to the workshops and were held as parallel events. Four workshops were organized, by invitation to prominent and distinguished colleagues, namely:

- The Third CoPA (Conformal Prediction and Its Applications)
- The Third MHDW (Mining Humanistic Data Workshop)
- The Third IIVC (Intelligent Innovative Ways for Video-to-Video Communications in Modern Smart Cities)
- The First MT4BD (New Methods and Tools for Big Data)

It is interesting that three of the above workshops were organized for the third time in the row, which means that they are well established in the AI community.

As the title of the conference denotes, there are two core orientations of interest, basic research AI approaches and also applications in real-world cases. The diverse nature of papers presented demonstrates the vitality of AI computing methods and proves the wide range of AI applications.

All papers went through a peer-review process by at least two independent academic reviewers. Where needed, a third and a fourth reviewer was consulted to resolve any potential conflicts. In the 10th AIAI conference, 41.3% of the submitted manuscripts (62) were accepted for oral presentation. From these, only 33 (22%) were accepted as full papers, whereas 29 (19.3%) were accepted as short ones. The authors of accepted papers of the main event come from 20 countries, namely: Brazil, Bulgaria, Canada, Cyprus, China, Czech Republic, Denmark, Finland, Germany, Great Britain, Greece, Iran, Italy, Pakistan, Poland, Russia, Spain, Switzerland, Tunisia, and Turkey.

Three distinguished keynote speakers were invited to present a lecture at the 10th AIAI conference.

1. Professor Hojjat Adeli, Ohio State University, USA.

Title: “Multi-Paradigm Computational Intelligence Models for EEG-Based Diagnosis of Neurological and Psychiatric Disorders”

- Professor in the Departments of Biomedical Informatics, Civil and Environmental Engineering and Geodetic Science and Neuroscience and Centers of Biomedical Engineering and Cognitive Science
- Director of Knowledge Engineering Lab at the Ohio State University
- Author of nearly 400 research and scientific publications in various fields of computer science, engineering, and applied mathematics since 1976 when he received his Ph.D. from Stanford University
- Author of nine books
- Founder and Editor-in-Chief of the international research journals *Computer-Aided Civil and Infrastructure Engineering* and *Integrated Computer-Aided Engineering*
- Over 100 academic, research, and leadership awards, honors, and recognition
- Keynote/plenary lecturer at 43 national and international computing conferences held in 28 different countries

2. Professor Plamen Angelov, Lancaster University, UK.

Title: “Autonomous Learning Systems: Association-Based Learning”

- Chair in Intelligent Systems and leads the Intelligent Systems Research within the School of Computing and Communications, Lancaster University, UK
- Founding Chair of the Technical Committee on Evolving Intelligent Systems with Systems, Man and Cybernetics Society, IEEE
- Co-recipient of several best paper awards at IEEE conferences (2006 and 2009, 2012, 2013)
- Co-recipient of two prestigious Engineer 2008 Technology + Innovation awards for Aerospace and Defense
- Co-recipient of the Special Award as well as the Outstanding Contributions Award by IEEE and INNS (2013)

- Editor-in-Chief of the Springer journal *Evolving Systems*, Associate Editor of the prestigious *IEEE Transactions on Fuzzy Systems* and of Elsevier's *Fuzzy Sets and Systems*

3. Professor Tharam Dillon, La Trobe University, Australia

Title: "Conjoint Mining of Data and Content with Applications in Business, Bio-medicine, Transport Logistics and Electrical Power Systems"

- Life Fellow IEEE, FACS, FIE
- Editor-in-Chief of the *International Journal of Computer Systems Science & Engineering* (UK) 1986–1991 Butterworths, 1992–1996 CRL Publishing
- Editor-in-Chief of the *International Journal of Engineering Intelligent Systems* (UK) 1993–1996
- Chief Co-editor of the *International Journal of Electric Power and Energy Systems* (UK) 1978–1991, Butterworths 1992–1996 Elsevier
- Associate Editor of *IEEE Transactions on Neural Networks* (USA) 1994–2004

The accepted papers of the 10th AIAI conference are related to the following thematic topics:

- | | |
|--|---|
| – Artificial neural networks | – Hybrid clustering systems |
| – Bioinformatics | – Image and video processing |
| – Feature extraction | – Multi-agent systems |
| – Clustering | – Environmental applications |
| – Control systems | – Multi-attribute DSS |
| – Data mining | – Ontology, intelligent tutoring systems |
| – Engineering applications of AI | – Optimization, genetic algorithms |
| – Face recognition, pattern recognition | – Recommendation systems |
| – Filtering | – Support vector machines, classification |
| – Fuzzy logic | – Text mining |
| – Genetic algorithms, evolutionary computing | |
- We wish to thank Professors Harris Papadopoulos (Frederick University, Cyprus), Alex Gammerman and Vladimir Vovk (Royal Holloway University of London, UK) for their common efforts toward the organization of the third CoPA workshop.
 - We are also grateful to Professors Spyros Sioutas, Katia Lida Kermanidis (Ionian University, Greece), Christos Makris (University of Patras, Greece), and Giannis Tzimas (TEI of Western Greece). Thanks to their invaluable contribution and hard work, the third MHDW workshop was held successfully once more and it has already become a well-accepted event running in parallel with AIAI.

- The third IIVC workshop was an important part of the AIAI 2014 event and it was driven by the hard work of Drs. Ioannis P. Chochliouros and Ioannis M. Stephanakis (Hellenic Telecommunications Organization—OTE, Greece) and Professors Vishanth Weerakkody (Brunel University, UK) and Nancy Alonistioti (National and Kapodistrian University of Athens, Greece).
- It was a pleasure to host the MT4BD 2014 in the framework of the AIAI conference. We wish to sincerely thank its organizers for their great efforts. More specifically we wish to thank Professors Spiros Likothanassis (University of Patras, Greece), Dimitrios Tzovaras (CERTH/ITI, Greece), Eero Hyvönen (Aalto University, Finland), and Jörn Kohlhammer (Fraunhofer-Institut für Graphische Datenverarbeitung IGD, Germany).

A Keynote lecture was given by Dr. Dimitrios Tzovaras in the framework of the MT4BD 2014 workshop.

Title: Visual Analytics Technologies for the Efficient Processing and Analysis of Big Data

The AIAI 2014 conference had a high attendance from scientists from all parts of the globe and we would like to thank all participants for this. The organization of the 10th AIAI was truly a milestone. After 10 years, it has been established as a mature event with loyal followers and it has plenty of new and qualitative research results to offer the international scientific community. We hope that the readers of these proceedings will be highly motivated and stimulated for further research in the domain of AI in general.

Table of Contents

Keynote

Conjoint Mining of Data and Content with Applications in Business, Bio-medicine, Transport Logistics and Electrical Power Systems	1
<i>Tharam S. Dillon, Yi-Ping Phoebe Chen, Elizabeth Chang, and Mukesh Mohania</i>	

Learning-Ensemble Learning

Breaking Ties of Plurality Voting in Ensembles of Distributed Neural Network Classifiers Using Soft Max Accumulations	20
<i>Yiannis Kokkinos and Konstantinos G. Margaritis</i>	
Predicting Firms' Credit Ratings Using Ensembles of Artificial Immune Systems and Machine Learning – An Over-Sampling Approach	29
<i>Petr Hájek and Vladimír Olej</i>	
Automating Transition Functions: A Way to Improve Trading Profits with Recurrent Reinforcement Learning	39
<i>Jin Zhang</i>	
Utilising Tree-Based Ensemble Learning for Speaker Segmentation	50
<i>Mohamed Abou-Zleikha, Zheng-Hua Tan, Mads Græsbøll Christensen, and Søren Holdt Jensen</i>	

Social Media and Mobile Applications of AI

Speakers' Language Characteristics Analysis of Online Educational Videos	60
<i>Dimitrios Kravvaris and Katia Lida Kermanidis</i>	
Fall Detection Using Commodity Smart Watch and Smart Phone	70
<i>Ilias Maglogiannis, Charalampos Ioannou, George Spyroglou, and Panayiotis Tsanakas</i>	
Predicting Information Diffusion Patterns in Twitter	79
<i>Eleanna Kafeza, Andreas Kanavos, Christos Makris, and Pantelis Vikatos</i>	
An Ensemble of HMMs for Cognitive Fault Detection in Distributed Sensor Networks	90
<i>Manuel Roveri and Francesco Trovò</i>	

Modeling ReTweet Diffusion Using Emotional Content 101
*Andreas Kanavos, Isidoros Perikos, Pantelis Vikatos,
 Ioannis Hatzilygeroudis, Christos Makris, and Athanasios Tsakalidis*

Hybrid - Changing Environments

A Partially-Observable Markov Decision Process for Dealing with
 Dynamically Changing Environments 111
Sotirios P. Chatzis and Dimitrios Kosmopoulos

Platform for Simulation and Improvement of Swarm Behavior in
 Changing Environments 121
Sergi Canyameres and Doina Logofătu

A Neuro-memetic System for Music Composing 130
Jacek Mańdziuk, Aleksandra Woźniczko, and Marcin Goss

Profound Degree: A Conservative Heuristic to Repair Dynamic CSPs . . . 140
*Yosra Acodad, Amine Benamrane, Imade Benelallam, and
 El Houssine Bouyakhf*

Agents (AGE)

A Greedy Agent-Based Resource Allocation in the Smart Electricity
 Markets 150
*Armin Ghasem Azar, Mansoor Davoodi, Mohsen Afsharchi, and
 Bahram Sadeghi Bigham*

Implicit Predictive Indicators: Mouse Activity and Dwell Time 162
Stephen Akuma, Chrisina Jayne, Rahat Iqbal, and Faiyaz Doctor

Normative Monitoring of Agents to Build Trust in an Environment for
 B2B 172
*Eugénio Oliveira, Henrique Lopes Cardoso,
 Maria Joana Urbano, and Ana Paula Rocha*

Extending the Kouretes Statechart Editor for Generic Agent Behavior
 Development 182
*Georgios Papadimitriou, Nikolaos I. Spanoudakis, and
 Michail G. Lagoudakis*

Hierarchic Fuzzy Approach Applied in the Development of an
 Autonomous Architecture for Mobile Agents 193
*Márcio Mendonça, Esdras Salgado da Silva,
 Karina Assolari Takano, Mauricio Iwama Takano, and
 Lúcia Valéria Ramos de Arruda*

Classification Pattern Recognition

Classification of Mammograms Using Cartesian Genetic Programming Evolved Artificial Neural Networks	203
<i>Arbab Masood Ahmad, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	
A Face Recognition Based Multiplayer Mobile Game Application	214
<i>Ugur Demir, Esam Ghaleb, and Hazım Kemal Ekenel</i>	
A Dynamic Questionnaire to Further Reduce Questions in Learning Style Assessment	224
<i>Espérance Mwamikazi, Philippe Fournier-Viger, Chadia Moghrabi, and Robert Baudouin</i>	
Recognizing Emotions from Facial Expressions Using Neural Network	236
<i>Isidoros Perikos, Epaminondas Ziakopoulos, and Ioannis Hatzilygeroudis</i>	
Automatically Detected Feature Positions for LBP Based Face Recognition	246
<i>Ladislav Lenc and Pavel Král</i>	
Limited Generalization Capabilities of Autoencoders with Logistic Regression on Training Sets of Small Sizes	256
<i>Alexey Potapov, Vita Batishcheva, and Maxim Peterson</i>	
A Pattern Recognition Approach for Peak Prediction of Electrical Consumption	265
<i>Morten Goodwin and Anis Yazidi</i>	
Semi-automatic Measure and Identification of Allergenic Airborne Pollen	276
<i>Antonio García-Manso, Carlos J. García-Orellana, Rafael Tormo-Molina, Ramón Gallardo-Caballero, M. Macías-Macías, and Horacio M. González-Velasco</i>	

Genetic Algorithms

Enhancing Growth Curve Approach Using CGPANN for Predicting the Sustainability of New Food Products	286
<i>Jawad Ali, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	
DX-IFD: An Intelligent Force Deployment System	298
<i>Junpeng Bao, Yuepeng Zhang, Wenqing Wang, Jun Zeng, De Zhang, and Ruiyu Yuan</i>	

A Practical Application of Evolving Fuzzy-Rule-Based Classifiers for the Development of Spoken Dialog Systems	307
<i>David Griol, José Antonio Iglesias, Agapito Ledezma, and Araceli Sanchis</i>	
Sequence Matching Genetic Algorithm for Square Jigsaw Puzzles	317
<i>Josef Hynek</i>	
Scalable Distributed Genetic Algorithm for Data Ordering Problem with Inversion Using MapReduce	325
<i>Doina Logofătu and Daniel Stamate</i>	
Application of Evolutionary Algorithms in Project Management	335
<i>Christos Kyriklidis and Georgios Dounias</i>	
Inverse Reliability Task: Artificial Neural Networks and Reliability-Based Optimization Approaches	344
<i>David Lehký, Ondřej Slowik, and Drahomír Novák</i>	

Image - Video Processing

Model-Based Generation of Realistic 3D Full Body Avatars from Uncalibrated Multi-view Photographs	354
<i>Nicholas Michael and Andreas Lanitis</i>	
Data-Driven Motion Reconstruction Using Local Regression Models	364
<i>Christos Mousas, Paul Newbury, and Christos-Nikolaos Anagnostopoulos</i>	
Calculation of Complex Zernike Moments with Geodesic Correction for Pose Recognition in Omni-directional Images	375
<i>Kostas K. Delibasis, Spiros Georgakopoulos, Vassilis Plagianakos, and Ilias Maglogiannis</i>	
Fish-Eye Camera Video Processing and Trajectory Estimation Using 3D Human Models	385
<i>Konstantina Kottari, Kostas Delibasis, Vassilis Plagianakos, and Ilias Maglogiannis</i>	

Feature Extraction

Analysis of Relevant Features for Pollen Classification	395
<i>Gildardo Lozano-Vega, Yannick Benezeth, Franck Marzani, and Frank Boochs</i>	
Identifying Features with Concept Drift in Multidimensional Data Using Statistical Tests	405
<i>Piotr Sobolewski and Michał Woźniak</i>	

Features Extraction of Growth Trend in Social Websites Using Non-linear Genetic Programming	414
<i>Umer Khayam, Durre Nayab, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	

Environmental AI

Comparison of Self Organizing Maps Clustering with Supervised Classification for Air Pollution Data Sets	424
<i>Ilias Bougoudis, Lazaros Iliadis, and Stefanos Spartalis</i>	
Predicting Water Permeability of the Soil Based on Open Data	436
<i>Jonne Pohjankukka, Paavo Nevalainen, Tapio Pahikkala, Eija Hyvönen, Pekka Hänninen, Raimo Sutinen, Jari Ala-Ilomäki, and Jukka Heikkonen</i>	
Solar Radiation Time-Series Prediction Based on Empirical Mode Decomposition and Artificial Neural Networks	447
<i>Petros-Fotios Alvanitopoulos, Ioannis Andreadis, Nikolaos Georgoulas, Michalis Zervakis, and Nikolaos Nikolaidis</i>	
Extracting Trends Ensembles in Solar Irradiance for Green Energy Generation Using Neuro-evolution	456
<i>Mehreen Rehman, Jawad Ali, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	

Simulations and Fuzzy Modeling

Optimal Control Using Feedback Linearization for a Generalized T-S Model	466
<i>Agustín Jiménez, Basil Mohammed Al-Hadithi, Juan Pérez-Oria, and Luciano Alonso</i>	
HHT-Based Artificial Seismic Accelerograms Generation	476
<i>Eleni Vrochidou, Petros-Fotios Alvanitopoulos, Ioannis Andreadis, Anaxagoras Elenas, and Katerina Mallousi</i>	
Peak Observer Based Self-tuning of Type-2 Fuzzy PID Controllers	487
<i>Engin Yesil, Tufan Kumbasar, M. Furkan Dodurka, and Ahmet Sakalli</i>	
TSK Fuzzy Modeling with Nonlinear Consequences	498
<i>Jacek Kabziński and Jarosław Kacerka</i>	

Data Mining-Forecasting

Novel Techniques for Text Annotation with Wikipedia Entities	508
<i>Christos Makris and Michael Angelos Simos</i>	

An Avatar-Based Weather Forecast Sign Language System for the Hearing-Impaired	519
<i>Juhyun Oh, Seonggyu Jeon, Minho Kim, Hyukchul Kwon, and Iktae Kim</i>	
Interpretation of Possessive and Reflexive-Possessive Pronouns of Bulgarian Language in DATR	528
<i>Velislava Stoykova</i>	
Forecasting Algorithm Adaptive Automatically to Time Series Length	537
<i>Kolyo Onkov and Georgios Tegos</i>	

AI Applications - Mobile Applications

Six Degrees of Freedom Implicit Haptic Rendering	546
<i>Konstantinos Moustakas</i>	
Application of Supervised Self Organising Models for Wheat Yield Prediction	556
<i>Xanthoula Eirini Pantazi, Dimitrios Moshou, Abdul Mounem Mouazen, Boyan Kuang, and Thomas Alexandridis</i>	
Prediction of 30-Day Mortality after a Hip Fracture Surgery Using Neural and Bayesian Networks	566
<i>Dimitrios Galitsatos, George C. Anastassopoulos, Georgios Drosos, Athanasios Ververidis, Konstantinos Tilkeridis, and Konstantinos Kazakos</i>	
Application of Artificial Neural Network to Predict Static Loads on an Aircraft Rib	576
<i>Ramin Amali, Samson Cooper, and Siamak Noroozi</i>	
Android Based Electronic Travel Aid System for Blind People	585
<i>Paraskevas Diamantatos and Ergina Kavallieratou</i>	

Image Video Processing 4

Shoreline Extraction from Coastal Images Using Chebyshev Polynomials and RBF Neural Networks	593
<i>Anastasios Rigos, Olympos P. Andreadis, Manousakis Andreas, Michalis I. Vousdoukas, George E. Tsekouras, and Adonis Velegrakis</i>	
Automation System Development for Micrograph Recognition for Mineral Ore Composition Evaluation in Mining Industry	604
<i>Olga E. Baklanova, Olga Shvets, and Zhanbai Uzdenbaev</i>	

Similarity Based Cross-Section Segmentation in Rough Log
End Images 614
Rudolf Schraml and Andreas Uhl

Visual Security Evaluation Based on SIFT Object Recognition..... 624
Stefan Jenisch and Andreas Uhl

Author Index 635
