IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year. A federation for societies working in information processing, IFIP's aim is two-fold: to support information processing in the countries of its members and to encourage technology transfer to developing nations. As its mission statement clearly states:

IFIP is the global non-profit federation of societies of ICT professionals that aims at achieving a worldwide professional and socially responsible development and application of information and communication technologies.

IFIP is a non-profit-making organization, run almost solely by 2500 volunteers. It operates through a number of technical committees and working groups, which organize events and publications. IFIP's events range from large international open conferences to working conferences and local seminars.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is generally smaller and occasionally by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

IFIP distinguishes three types of institutional membership: Country Representative Members, Members at Large, and Associate Members. The type of organization that can apply for membership is a wide variety and includes national or international societies of individual computer scientists/ICT professionals, associations or federations of such societies, government institutions/government related organizations, national or international research institutes or consortia, universities, academies of sciences, companies, national or international associations or federations of companies.

Preface

The revolution in the information and communication technology (ICT) is rapidly transforming our world. The manufacturing industry is not an exception and it has already gone through profound changes due to the technological advancements in information technology. The digitization of production systems has been the most influential trend in the manufacturing industry over the past few years. The concept of Cyber-physical Production System (CPPS) is now being increasingly adopted in various sectors of the manufacturing industry to promote further intelligence, connectivity, and responsiveness throughout in the product value chain. There are several enablers of the vision of digitized, cyber-enabled, sustainable, and smart production system, including big data analytics, artificial intelligence, virtual and augmented reality, digital twin, and Human-Machine Interaction (HMI). These are the key components of the fourth industrial revolution and the main research thrusts in smart manufacturing and Industry 4.0 research community. The core challenge is how to improve the effectiveness and efficiency of production systems and, at the same time, enhance their sustainability and intelligence. Also, redefining the role of human in the new generation of automated production systems is a major challenge faced by researchers and practitioners.

APMS 2019 in Austin, Texas brought together leading international experts from academia, industry, and government in the area of production systems to discuss globally pressing issues in smart manufacturing, operations management, supply chain management, and Industry 4.0. A large international panel of experts reviewed all the papers and selected the best ones to be included in these conference proceedings. The topics of interest in APMS 2019 included Smart Supply Networks, Knowledge-Based Product Development, Smart Factory and IIOT Data-Driven Production Management, Lean Production, and Sustainable Production Management.

The proceedings are organized in two parts:

- Production Management for the Factory of the Future (Volume 1)
- Towards Smart Production Management Systems (Volume 2)

The conference was supported by the International Federation of Information Processing (IFIP) and was organized by the IFIP Working Group 5.7 on Advances in Production Management Systems and Texas State University. We would like to thank all contributors for their high-quality work and for their willingness to share their innovative ideas and findings. We are also indebted to the members of the IFIP Working Group 5.7, the Program Committee members, and the Scientific Committee members for their support in the review of the papers. Finally, we appreciate the

generous support from our sponsors, namely, Texas State University - College of Science and Engineering, the University of Texas at Dallas - Naveen Jindal School of Management, AlphaNodus, and PennState Service Enterprise Engineering.

Contents – Part I

Lean Production

Total Quality Management and Quality Circles in the Digital Lean Manufacturing World	3
<i>David Romero, Paolo Gaiardelli, Daryl Powell, Thorsten Wuest, and Matthias Thürer</i>	
Practical Boundary Case Approach for Kanban Calculation on the Shop Floor Subject to Variation	12
<i>Christoph Roser and Daniel Nold</i>	
Options for Maintaining Weak FIFO in Parallel Queues.	21
<i>Kaan Kalkanci and Christoph Roser</i>	
Sketching the Landscape for Lean Digital Transformation	29
<i>Alireza Ashrafian, Daryl J. Powell, Jonas A. Ingvaldsen, Heidi C. Dreyer, Halvor Holtskog, Peter Schütz, Elsebeth Holmen, Ann-Charlott Pedersen, and Eirin Lodgaard</i>	
Cyber-Physical Waste Identification and Elimination Strategies in the Digital Lean Manufacturing World.	37
<i>David Romero, Paolo Gaiardelli, Matthias Thürer, Daryl Powell, and Thorsten Wuest</i>	
Using Prescriptive Analytics to Support the Continuous Improvement Process.	46
<i>Günther Schuh, Jan-Philipp Prote, Thomas Busam, Rafael Lorenz, and Torbjörn H. Netland</i>	
Lean Leadership in Production Ramp-Up.	54
<i>Uwe Dombrowski and Jonas Wullbrandt</i>	
No Lean Without Learning: Rethinking Lean Production as a Learning System	62
<i>Daryl Powell and Eivind Reke</i>	
The Effect of Team Size on the Performance of Continuous Improvement Teams: Is Seven Really the Magic Number?.	69
<i>Daryl Powell and Rafael Lorenz</i>	
Lean and Digitalization—Contradictions or Complements?.	77
<i>Rafael Lorenz, Paul Buess, Julian Macuvele, Thomas Friedli, and Torbjörn H. Netland</i>	

Production Management in Food Supply Chains

Neuro-Fuzzy System for the Evaluation of Soya Production and Demand in Brazilian Ports	87
<i>Emerson Rodolfo Abraham, João Gilberto Mendes dos Reis, Aguiinaldo Eduardo de Souza, and Adriane Paulieli Colossetti</i>	
Port Logistic Support Areas (PLSA) for Exporting Grains: An Exploratory Case-Study in the Largest Port in Latin America	95
<i>Clayton Gerber Mangini, Irenilza de Alencar Nääs, Antônio Carlos Estender, Meykson Rodrigues Alves Cordeiro, and Aginaldo Vieira da Silva</i>	
Sustainability of Meat Chain: The Carbon Footprint of Brazilian Consumers	102
<i>Raquel Baracat T. R. Silva, João Gilberto Mendes Reis, Thayla M. R. Carvalho Curi, Nilza D. S. Lima, Solimar Garcia, and Irenilza de Alencar Nääs</i>	
Global Warming Impact in a Food Distribution System: A Case-Study in an Elementary School in Piauí	108
<i>Genyvana Criscya G. Carvalho, Ivonalda Brito de Almeida Moraes, Manoel Eulálio Neto, Raimundo Nonato Moura Rodrigues, Francisco Canindé Dias Alves, Irenilza de Alencar Nääs, and Oduvaldo Vendrametto</i>	
Broiler Meat Production in Piauí State: A Case Study	116
<i>Eldelita A. P. Franco, Lilane de A. M. Brandão, José A. A. Luz, Kelly L. F. Gonçalves, and Irenilza de A. Nääs</i>	
Collaborative Production Chains: A Case-Study of Two Agri-Food Companies in Brazil	123
<i>Yuri Claudio C. de Lima, Silvia Piva R. de Moraes, Luis A. Mendes de M. Araujo, Daiane da S. A. Castelo Branco, and Irenilza de A. Nääs</i>	
An Evaluation of Brazilian Ports for Corn Export Using Multicriteria Analysis	129
<i>Aguiinaldo Eduardo de Souza, João José Giardulli Junior, João Gilberto Mendes dos Reis, Ataíde Pereira Cardoso Junior, Paula Ferreira da Cruz Correia, Ricardo Zandonadi Schimidt, José Benedito Sacomano, and Márcia Terra da Silva</i>	

Port Terminals Assessment: An Empirical Analysis of Requirements of Brazilian National Plan of Port Logistics	135
<i>Aguinaldo Eduardo de Souza, João Gilberto Mendes dos Reis, Ataíde Pereira Cardoso Junior, Emerson Rodolfo Abraham, Oduvaldo Vendrametto, Renato Marcio dos Santos, and Roberta Sobral Pinto</i>	
Brazilian Coffee Export Network: An Analysis Using SNA	142
<i>Paula F. da Cruz Correia, João Gilberto M. dos Reis, Aguinaldo E. de Souza, and Ataíde Pereira Cardoso Jr.</i>	
CNN-Based Growth Prediction of Field Crops for Optimizing Food Supply Chain	148
<i>Shunsuke Iitsuka, Nobutada Fujii, Daisuke Kokuryo, Toshiya Kaihara, and Shinichi Nakano</i>	
Asymmetrical Evaluation of Forecasting Models Through Fresh Food Product Characteristics.	155
<i>Flemming M. M. Christensen, Iskra Dukovska-Popovska, Casper S. Bojer, and Kenn Steger-Jensen</i>	
Horizontal Integration in Fresh Food Supply Chain	164
<i>Flemming M. M. Christensen, Soujanya Mantravadi, Iskra Dukovska-Popovska, Hans-Henrik Hvolby, Kenn Steger-Jensen, and Charles Møller</i>	
Reverse Logistics and Waste in the Textile and Clothing Production Chain in Brazil.	173
<i>Solimar Garcia, Irenilza de Alencar Nääs, Pedro Luiz de Oliveira Costa Neto, and João Gilberto Mendes dos Reis</i>	
Port Performance Measures in Brazil: An Analysis in Port of Santos.	180
<i>Renato Márcio dos Santos, João Gilberto Mendes dos Reis, Júlio Cesar Raymundo, Emerson Rodolfo Abraham, Ataíde Pereira Cardoso Junior, and Aguinaldo Eduardo de Souza</i>	
CO ₂ Gas Emissions of Soybean Production and Transportation in the Different Macro-regions of Mato Grosso State - Brazil	187
<i>Marley Nunes Vituri Toloi, Rodrigo Carlo Toloi, Helton Raimundo Oliveira Silva, João Gilberto Mendes dos Reis, and Silvia Helena Bonilla</i>	

Sustainability and Reconfigurability of Manufacturing Systems

Classification of Optical Technologies for the Mapping of Production Environments	197
<i>Marius Greger, Daniel Palm, Louis Louw, and Konrad von Leipzig</i>	
A DRC Scheduling for Social Sustainability: Trade-Off Between Tardiness and Workload Balance	206
<i>Muhammad Akbar and Takashi Irohara</i>	
Towards Reconfigurable Digitalized and Servitized Manufacturing Systems: Conceptual Framework.	214
<i>Xavier Boucher, Audrey Cerqueus, Xavier Delorme, Clemens Gonnermann, Magdalena Paul, Gunther Reinhart, Julia Schulz, and Fabian Sippl</i>	
Simulation of Reconfigurable Assembly Cells with Unity3D	223
<i>Magdalena Paul, Daria Leiber, Julian Pleli, and Gunther Reinhart</i>	
Decision Support System for Joint Product Design and Reconfiguration of Production Systems	231
<i>S. Ehsan Hashemi-Petroodi, Clemens Gonnermann, Magdalena Paul, Simon Thevenin, Alexandre Dolgui, and Gunther Reinhart</i>	
Simple Assembly Line Balancing Problem with Power Peak Minimization	239

Assessing Fit of Capacity Planning Methods for Delivery Date Setting: An ETO Case Study	265
<i>Swapnil Bhalla, Erlend Alfnes, and Hans-Henrik Hvolby</i>	
Data-Driven Production Management	
From a Theory of Production to Data-Based Business Models	277
<i>Günther Schuh, Malte Brettel, Jan-Philipp Prote, Andreas Gützlaff, Frederick Sauermann, Katharina Thomas, and Mario Piel</i>	
Real-Time Data Sharing in Production Logistics: Exploring Use Cases by an Industrial Study	285
<i>Masoud Zafarzadeh, Jannicke Baalsrud Hauge, Magnus Wiktorsson, Ida Hedman, and Jasmin Bahtijarevic</i>	

Scenarios for the Development and Use of Data Products
Within the Value Chain of the Industrial Food Production 294
Volker Stich, Lennard Holst, Philipp Jussen, and Dennis Schiemann

Bidirectional Data Management in Factory Planning and Operation 303
Uwe Dombrowski, Jonas Wullbrandt, and Alexander Karl

Open Access Digital Tools’ Application Potential in Technological
Process Planning: SMMEs Perspective. 312
Roman Wdowik and R. M. Chandima Ratnayake

Industry 4.0 Implementations

Implementation of Industry 4.0 in Germany, Brazil and Portugal:
Barriers and Benefits 323
*Walter C. Satyro, Mauro de Mesquita Spinola, Jose B. Sacomano,
Márcia Terra da Silva, Rodrigo Franco Gonçalves,
Marcelo Schneck de Paula Pessoa, Jose Celso Contador,
Jose Luiz Contador, and Luciano Schiavo*

Planning Guideline and Maturity Model for Intra-logistics 4.0 in SME 331
Knut Krowas and Ralph Riedel

Self-assessment of Industry 4.0 Technologies in Intralogistics for SME’s 339
Martina Schiffer, Hans-Hermann Wiendahl, and Benedikt Saretz

Industry 4.0 Visions and Reality- Status in Norway. 347
Hans Torvatn, Pål Kamsvåg, and Birgit Kløve

Exploring the Impact of Industry 4.0 Concepts on Energy
and Environmental Management Systems: Evidence from Serbian
Manufacturing Companies 355
*Milovan Medojevic, Nenad Medic, Ugljesa Marjanovic, Bojan Lalic,
and Vidosav Majstorovic*

Smart Factory and IIOT

Virtualization of Sea Trials for Smart Prototype Testing. 365
Moritz von Stietenron, Shantanoo Desai, and Klaus-Dieter Thoben

IoH Technologies into Indoor Manufacturing Sites 372
*Takeshi Kurata, Takashi Maehata, Hidehiko Hashimoto, Naohiro Tada,
Ryosuke Ichikari, Hideki Aso, and Yoshinori Ito*

3D Visualization System of Manufacturing Big Data and Simulation
Results of Production for an Automotive Parts Supplier 381
Dahye Hwang and Sang Do Noh

Cyber-Physical Systems

- Blockchain as an Internet of Services Application for an Advanced Manufacturing Environment 389
Benedito Cristiano A. Petroni, Jacqueline Zonichenn Reis, and Rodrigo Franco Gonçalves
- Development of a Modeling Architecture Incorporating the Industry 4.0 View for a Company in the Gas Sector 397
Nikolaos A. Panayiotou, Konstantinos E. Stergiou, and Vasileios P. Stavrou
- Process for Enhancing the Production System Robustness with Sensor Data – a Food Manufacturer Case Study 405
Sofie Bech, Thomas Ditlev Brunoe, and Kjeld Nielsen
- In-Process Noise Detection System for Product Inspection by Using Acoustic Data. 413
Woonsang Baek and Duck Young Kim

Knowledge Management in Design and Manufacturing

- Closed-Loop Manufacturing for Aerospace Industry: An Integrated PLM-MOM Solution to Support the Wing Box Assembly Process 423
Melissa Demartini, Federico Galluccio, Paolo Mattis, Islam Abusohyon, Raffaello Lepratti, and Flavio Tonelli
- Modeling Manual Assembly System to Derive Best Practice from Actual Data 431
Susann Kärcher, David Görzig, and Thomas Bauernhansl
- Application of a Controlled Assembly Vocabulary: Modeling a Home Appliance Transfer Line. 439
Chase Wentzky, Chelsea Spence, Apurva Patel, Nicole Zero, Adarsh Jeyes, Alexis Fiore, Joshua D. Summers, Mary E. Kurz, and Kevin M. Taaffe
- What Product Developers Really Need to Know - Capturing the Major Design Elements 447
Bjørnar Henriksen, Andreas Landmark, and Carl Christian Røstad

Collaborative Product Development

- Design-for-Cost – An Approach for Distributed Manufacturing Cost Estimation 457
Minchul Lee and Boonserm (Serm) Kulvatunyou

Computer-Aided Selection of Participatory Design Methods	466
<i>Michael Bojko, Ralph Riedel, and Mandy Tawalbeh</i>	
Knowledge Management Environment for Collaborative Design in Product Development.	475
<i>Shuai Zhang</i>	
A Multi-criteria Approach to Collaborative Product-Service Systems Design	481
<i>Martha Orellano, Khaled Medini, Christine Lambey-Checchin, Maria-Franca Norese, and Gilles Neubert</i>	
ICT for Collaborative Manufacturing	
MES Implementation: Critical Success Factors and Organizational Readiness Model.	493
<i>Daniela Invernizzi, Paolo Gaiardelli, Emrah Arica, and Daryl Powell</i>	
Identifying the Role of Manufacturing Execution Systems in the IS Landscape: A Convergence of Multiple Types of Application Functionalities	502
<i>S. Waschull, J. C. Wortmann, and J. A. C. Bokhorst</i>	
A Generic Approach to Model and Analyze Industrial Search Processes	511
<i>Philipp Steenwerth and Hermann Lödding</i>	
A Methodology to Assess the Skills for an Industry 4.0 Factory	520
<i>Federica Acerbi, Silvia Assiani, and Marco Taisch</i>	
Collaborative Technology	
A Theoretical Approach for Detecting and Anticipating Collaboration Opportunities	531
<i>Ibrahim Koura, Frederick Benaben, and Juanqiong Gou</i>	
The Systematic Integration of Stakeholders into Factory Planning, Construction, and Factory Operations to Increase Acceptance and Prevent Disruptions.	539
<i>Uwe Dombrowski, Alexander Karl, Colette Vogeler, and Nils Bandelow</i>	
Service Engineering Models: History and Present-Day Requirements.	547
<i>Roman Senderek, Jan Kuntz, Volker Stich, and Jana Frank</i>	
Design and Simulation of an Integrated Model for Organisational Sustainability Applying the Viable System Model and System Dynamics. . . .	555
<i>Sergio Gallego-García and Manuel García-García</i>	

Applications of Machine Learning in Production Management

Enabling Energy Efficiency in Manufacturing Environments Through Deep Learning Approaches: Lessons Learned 567
M. T. Alvela Nieto, E. G. Nabati, D. Bode, M. A. Redecker, A. Decker, and K.-D. Thoben

Retail Promotion Forecasting: A Comparison of Modern Approaches 575
Casper Solheim Bojer, Iskra Dukovska-Popovska, Flemming Max Møller Christensen, and Kenn Steger-Jensen

A Data Mining Approach to Support Capacity Planning for the Regeneration of Complex Capital Goods 583
Melissa Seitz, Maren Sobotta, and Peter Nyhuis

Developing Smart Supply Chain Management Systems Using Google Trend’s Search Data: A Case Study. 591
Ramin Sabbagh and Dragan Djurdjanovic

Collaborative Technology

Managing Knowledge in Manufacturing Industry - University Innovation Projects 603
Irina-Emily Hansen, Ola Jon Mork, and Torgeir Welø

Technology Companies in Judicial Reorganization 611
Ricardo Zandonadi Schmidt and Márcia Terra da Silva

Multiscale Modeling of Social Systems: Scale Bridging via Decision Making 617
Nursultan Nikhanbayev, Toshiya Kaihara, Nobutada Fujii, and Daisuke Kokuryo

e-Health: A Framework Proposal for Interoperability and Health Data Sharing. A Brazilian Case 625
Neusa Andrade, Pedro Luiz de Oliveira Costa Neto, Jair Gustavo de Mello Torres, Irapuan Glória Júnior, Cláudio Guimarães Scheidt, and Welleson Gazel

Managing Risk and Opportunities in Complex Projects 631
Asbjørn Rolstadås, Agnar Johansen, Yvonne C. Bjerke, and Tobias O. Malvik
