

Diagram illustrating a complex network structure, likely representing a system architecture or data flow. The diagram shows a dense web of connections between various nodes and components, organized into a structured layout. The connections are primarily red, with some green lines indicating specific paths or data flows. The nodes are represented by small circles, some of which are grouped into larger clusters. The overall structure suggests a hierarchical or modular design, with a central area of high connectivity and more structured paths extending towards the left and right edges. The diagram is oriented horizontally, with a central area of high connectivity and more structured paths extending towards the left and right edges.
