HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

LORIA

Computer Science and Health activities

Jean-Pierre Thomesse
LORIA - INPL
Institut National Polytechnique de Lorraine

LORIA

- 1 laboratory in computer science and applications
- 1 INPL, UHP, Nancy2, INRIA, CNRS
- 1 ~400 researchers
- 1 25 teams
- 1 common actions based on applications as :
 - health
 - transport

action Quant Ó

1 Computer Aided Diagnosis - Telemedicine

- based on health status modelling
- periodic data acquisition
- alarm generation
- self learning systems

1 Image analysis and synthesis - virtual reality

- 3D images reconstitution
- surgeon training
- neurology, cardiology, urology, É

action Quant Ó

1 Telemedicine - CAD - applications

- kidney disease
- heart failure patients
- high blood pressure patients
- diabetes
- anaesthesia follow-up
- elderly people

DI ATELIC: a new generation telemedicine system

- 1 interaction between the users
 - patient (CAPD)
 - physician
 - nephrologist
- 1 data acquisition and transmission
- 1 data analysis - health status model
 - diagnosis establishment
 - alarms detection and transmission
 - patient feedback
 - physician information

results

1 medical results

- half of hospitalisation days
- less consumption of drugs
- best weight
- best blood pressure

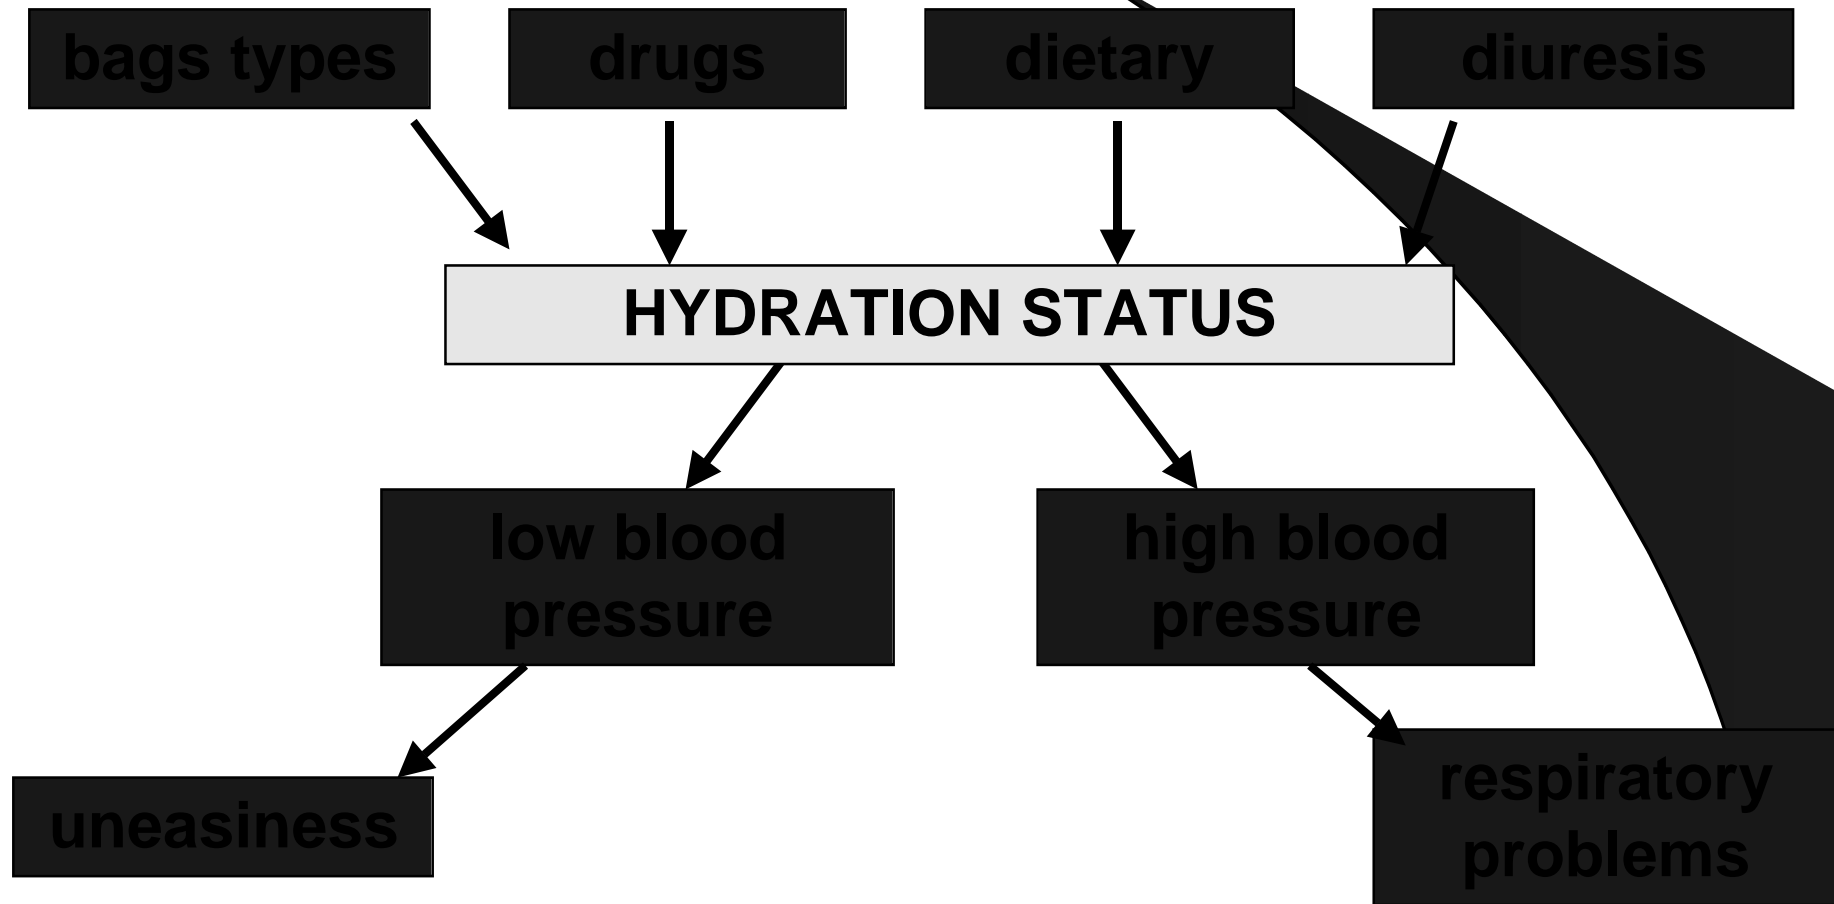

1 economical results

- economy of 10 000 euro/patient/year
- economy of time for physicians

methodology

- 1 co-operation with physicians
- 1 modelling stage, development and test
- 1 medical experiment, validation
- 1 patents
- 1 start-up, **DIATELIC SAÓ**
- 1 equipment of 150 patients in Lorraine in 2002

usual problems

Pathological State Space
